

# Toaster

## Common Failures:

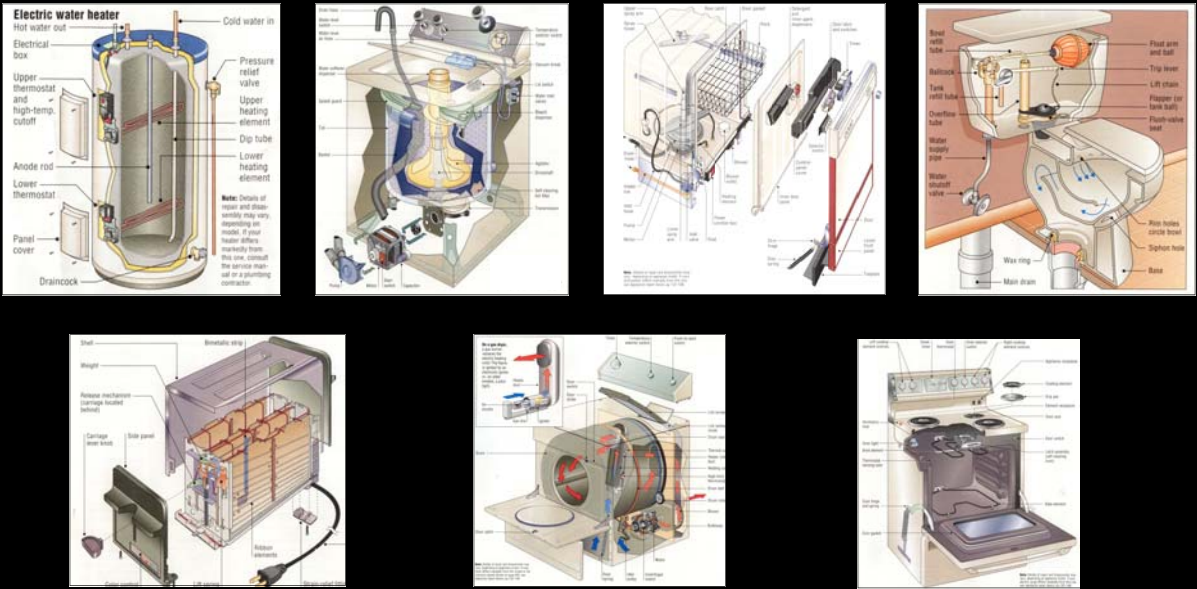

- Carriage mechanism—failure
- Electrical contacts—failure, sometimes fuses together
- Solenoid—failure causing overheating and fire.

# Product Failure

*Since 1991*

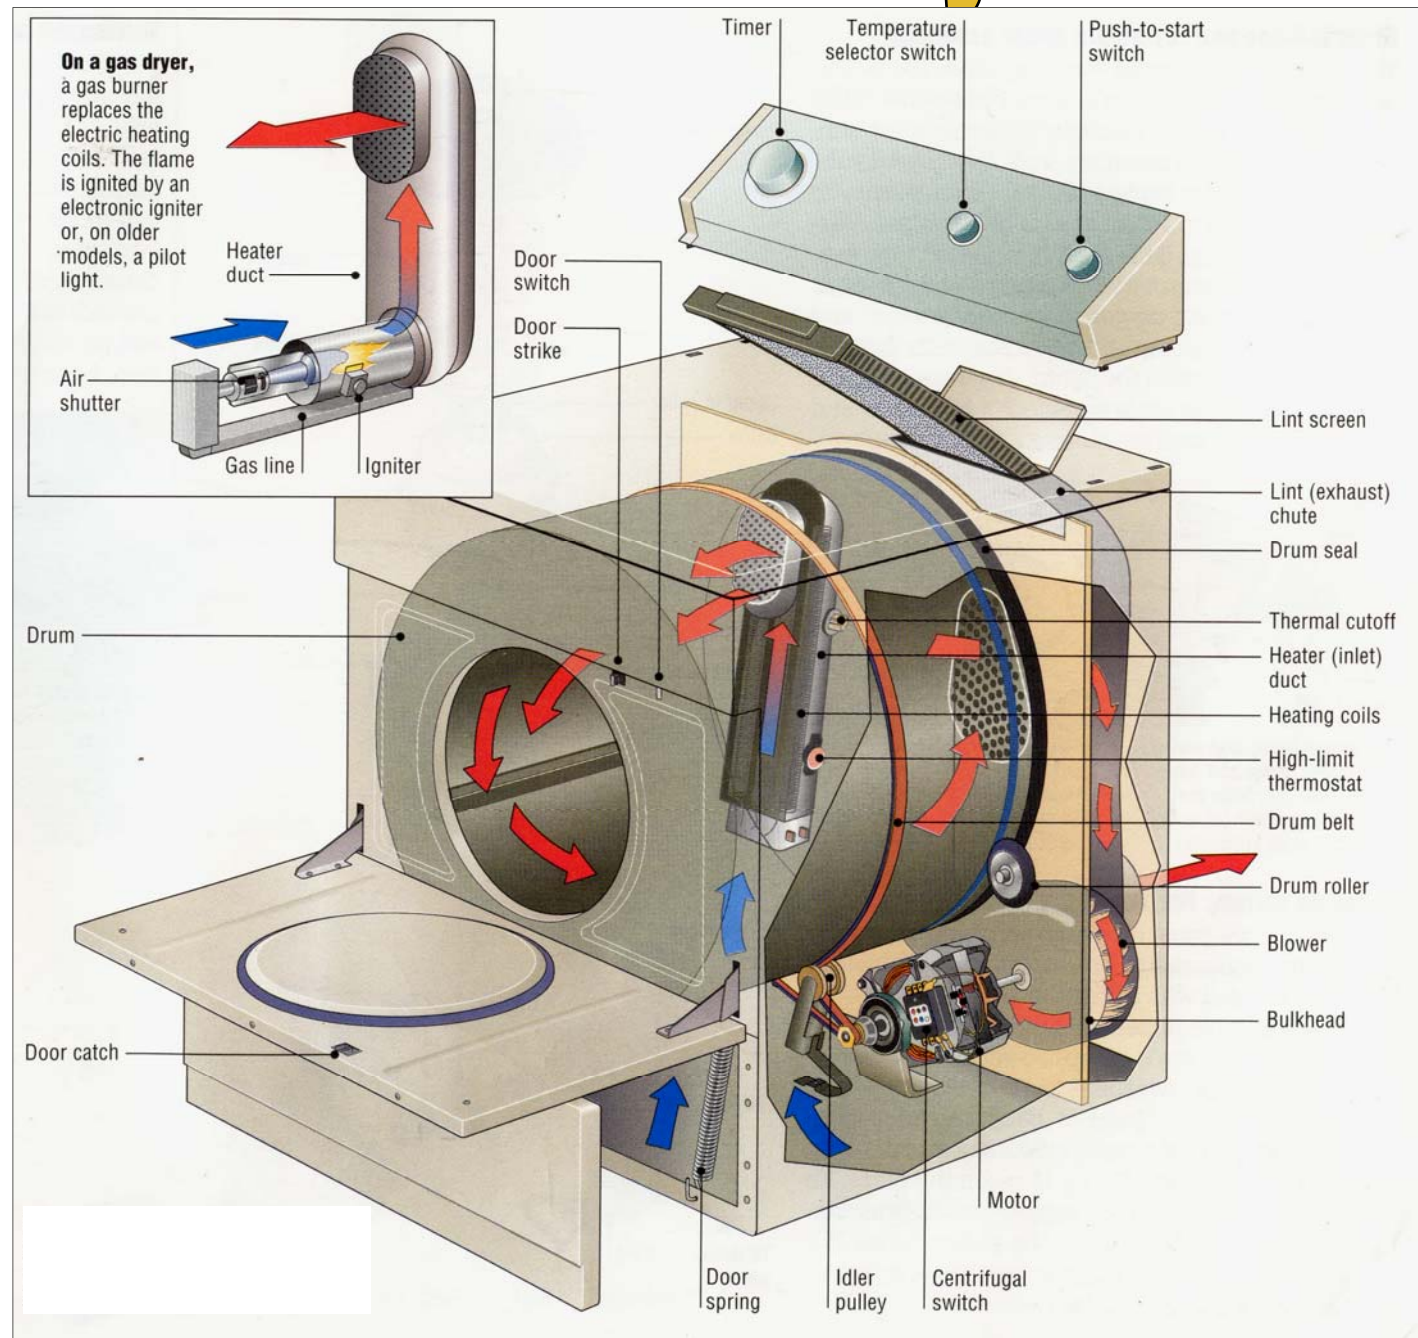

# Informational Flyer

Diversified Product Inspections, LLC

# Clothes Dryer

## Common Failures:

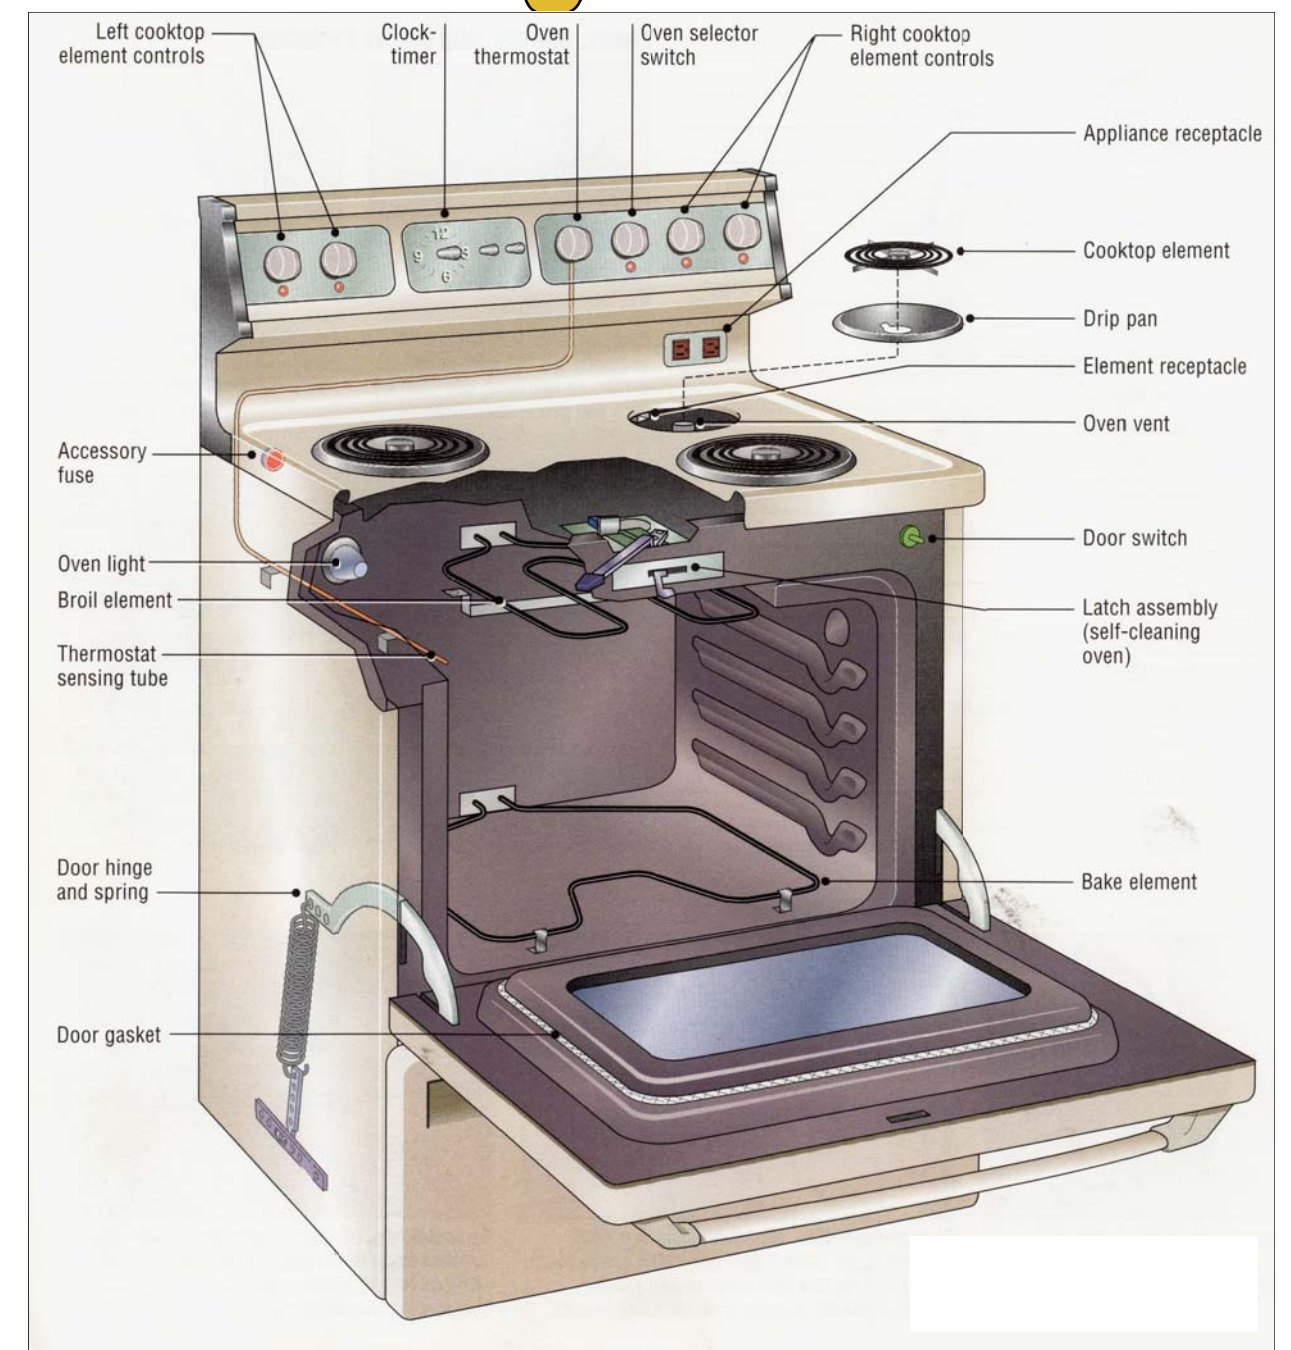

**Thermostats**—failure, causing overheating

**Motor**—failure

**Heating element/burner**—overheats

# Range Oven

## Common Failures:

**Control thermostats**—failure causing overheating

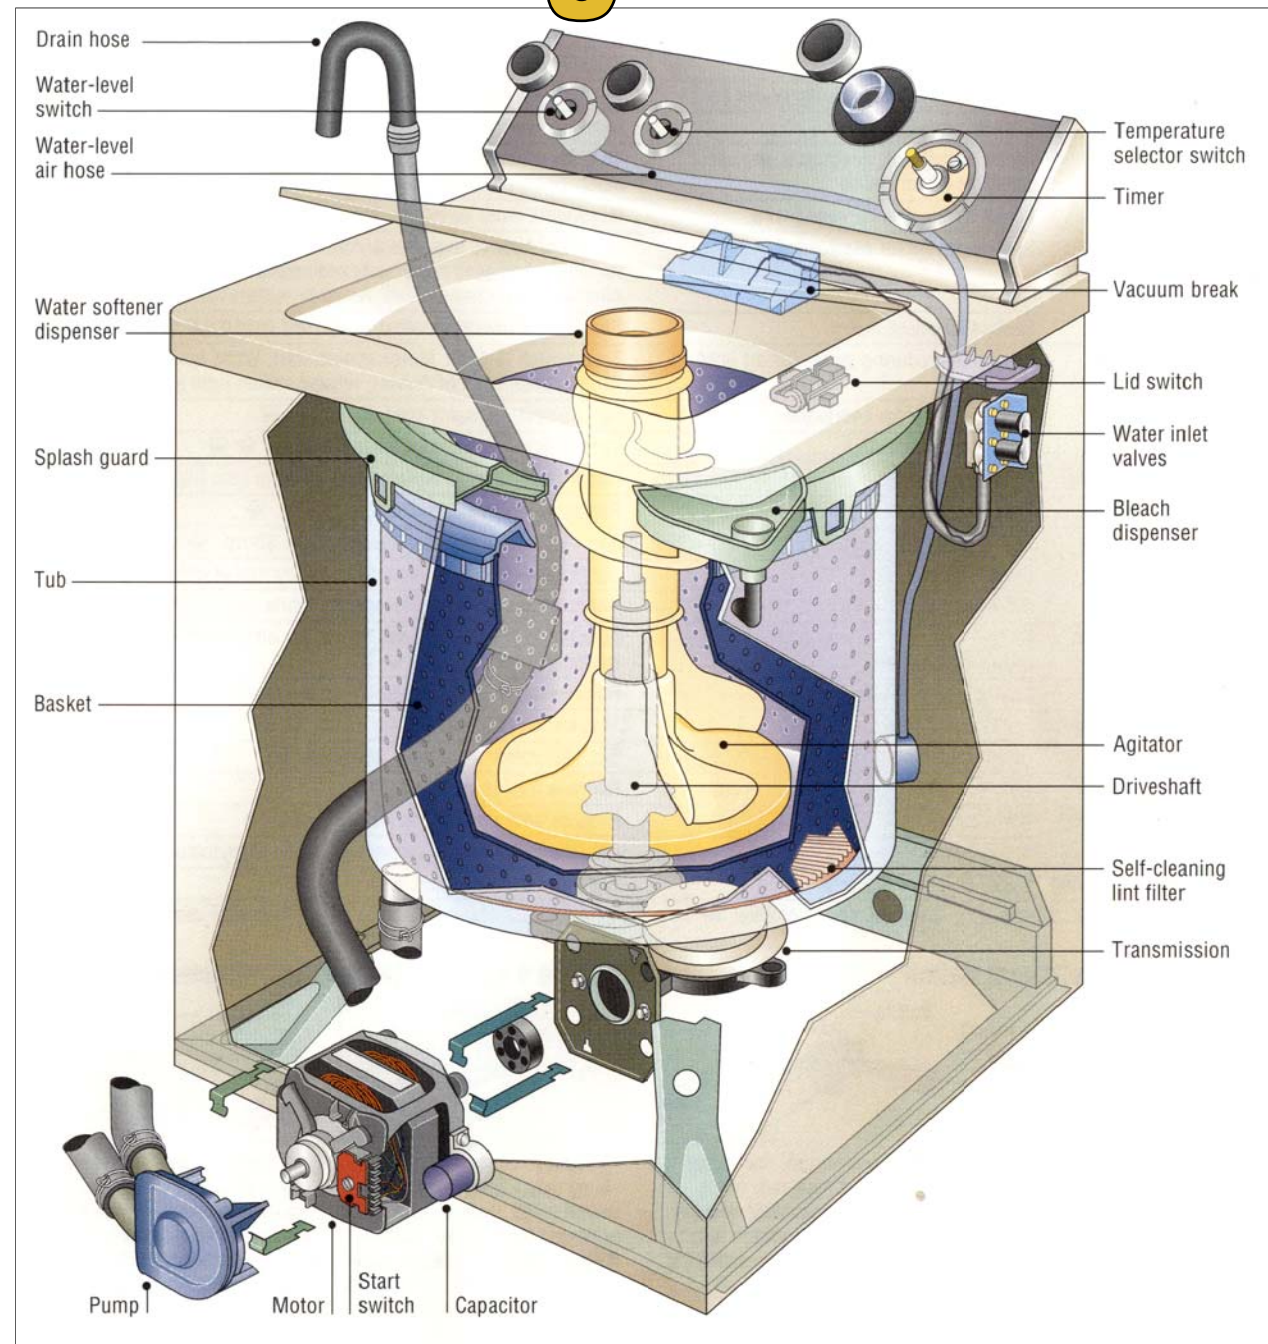

**Heating elements**—failure, overheating

**Control board**—failure

# Washing Machine

## Common Failures:

Water inlet valve—failure to shut off

Pump—leakage from bad seals

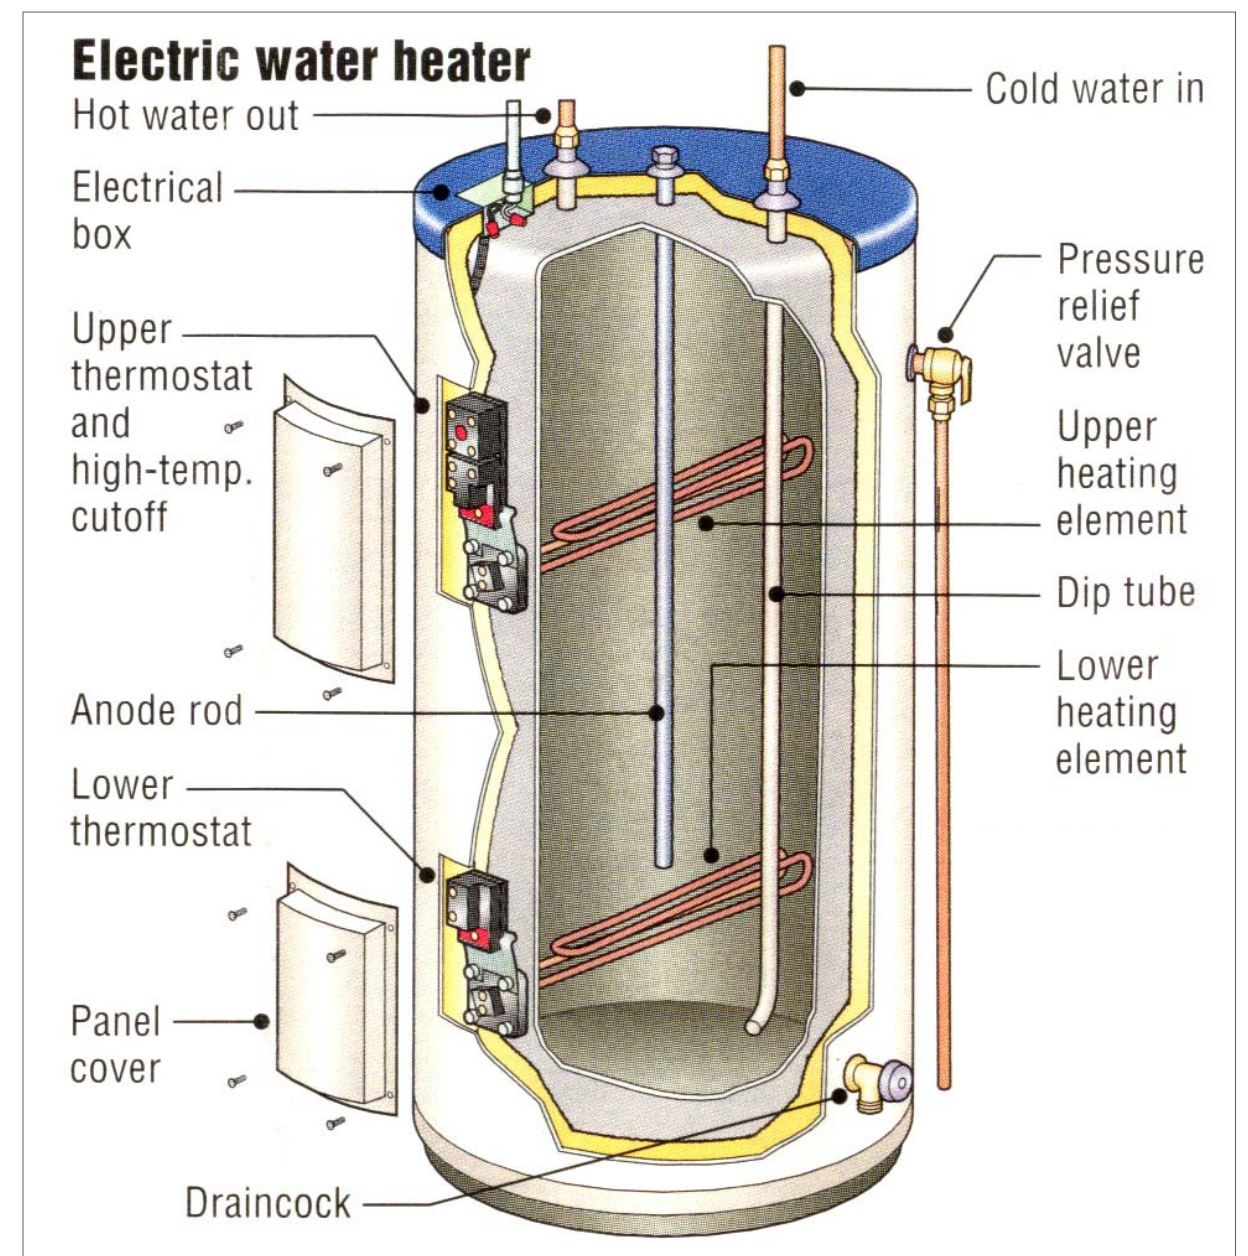

Water level switch—failure to shut off

Drain hose—leakage

Washer hose—failure and leakage

# Water Heater

## Common Failures:

Pressure relief valve—opens prematurely causing leakage

Drain cock—fracture causing leakage

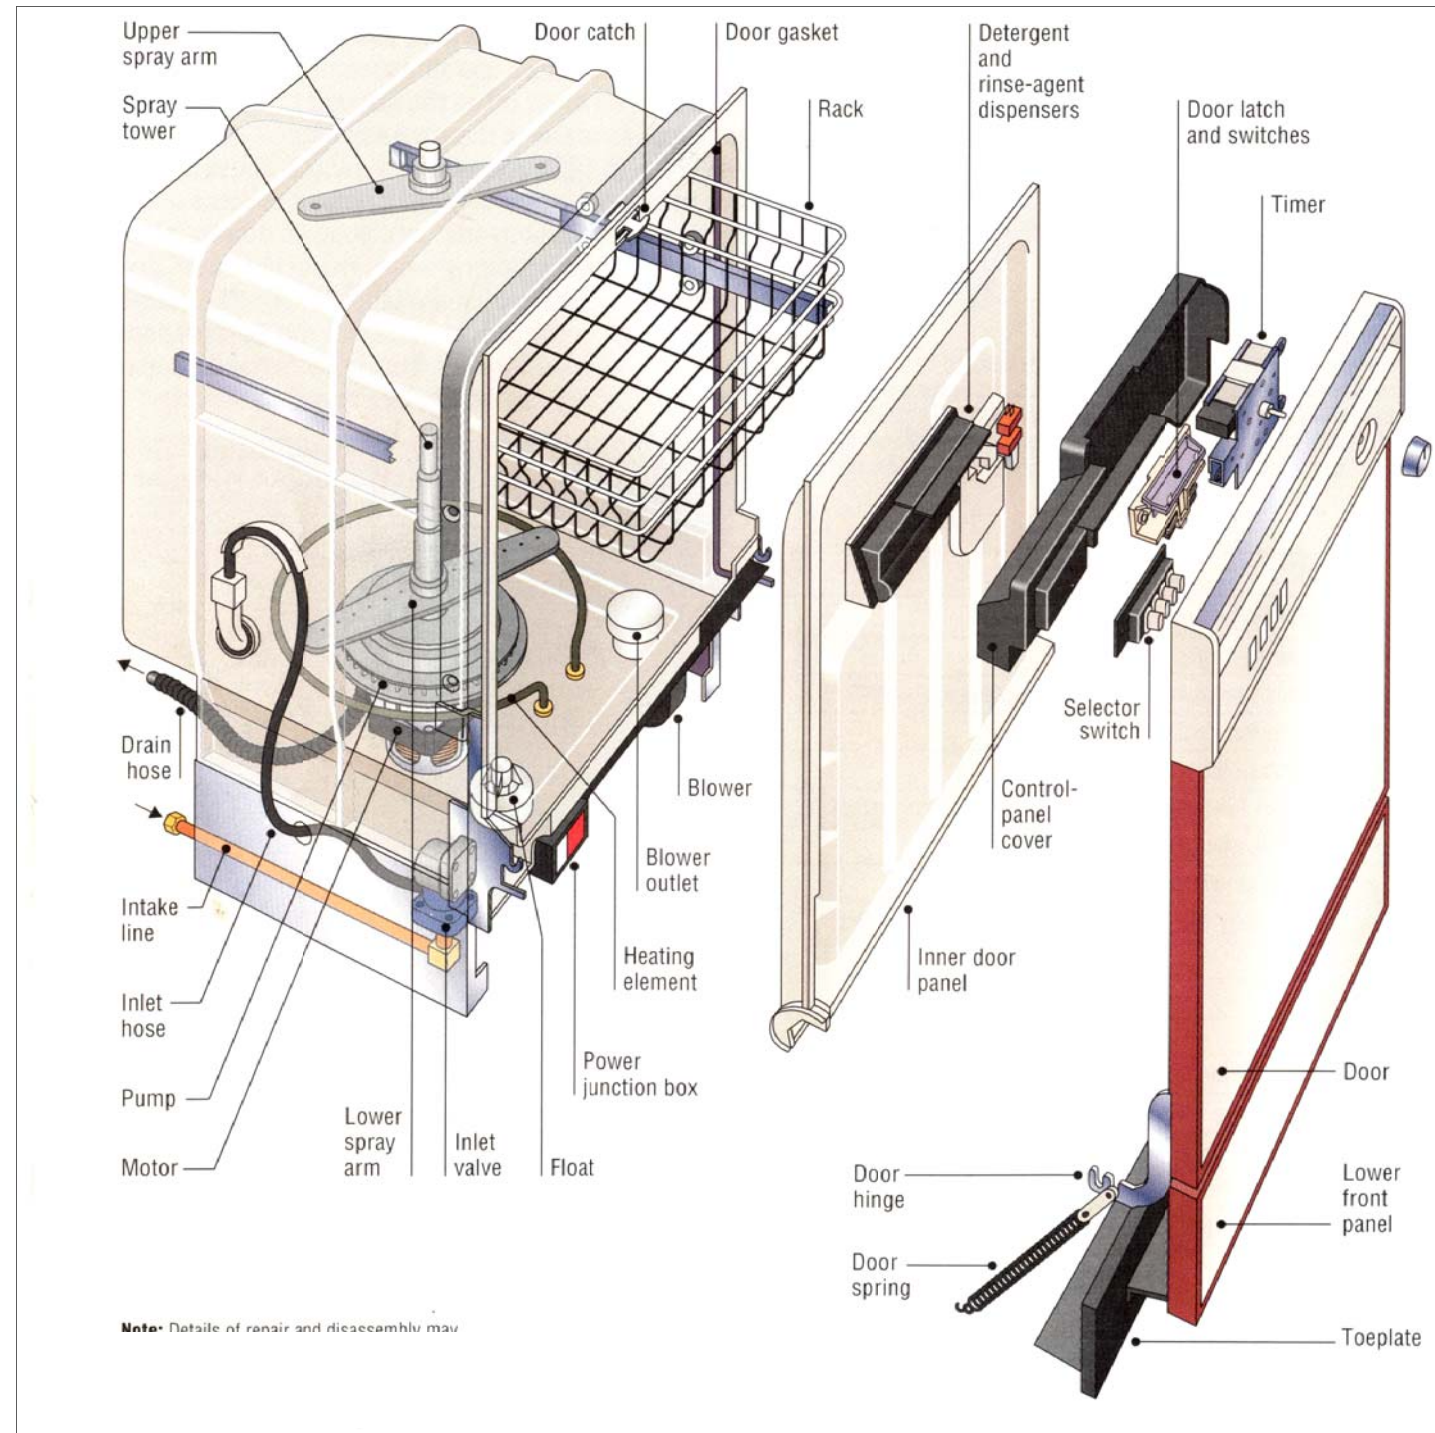

Tank failure—hole in tank, usually along weld seams

Water in/out—leakage from supply line failures

# Dishwasher

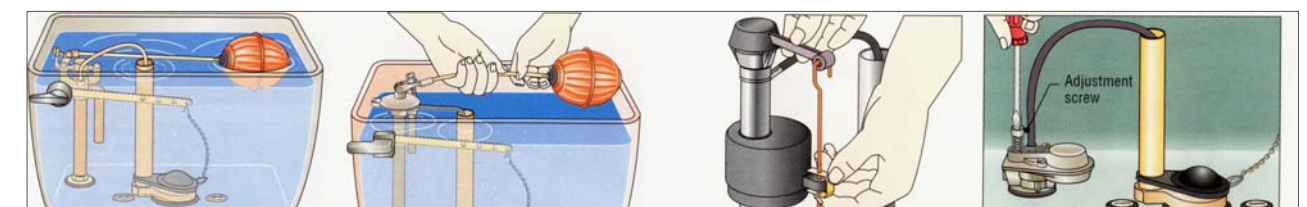

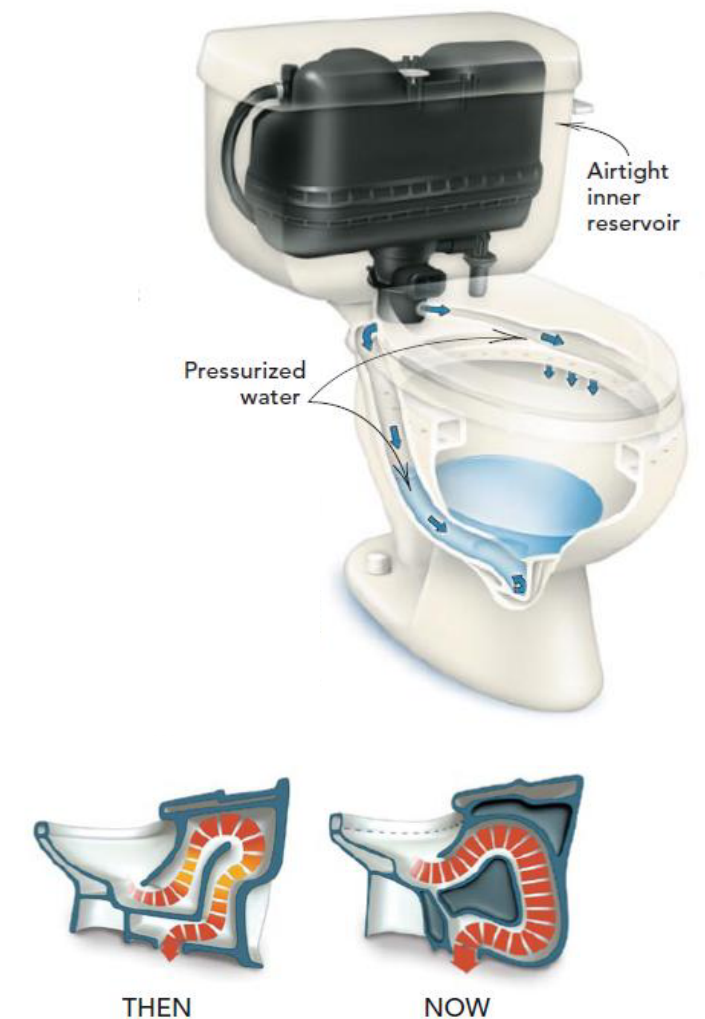

## Common Failures:

- Drain hose—leakage
- Inlet valve—failure to shut off
- Pump—leakage from bad seals
- Intake line—leakage

# Toilet

## Common Failures:

- Water Shutoff valve—leakage
- Toilet tank—fracture
- Water supply line—leakage
- Ballcock—failure to shut off
- Float arm and ball—fracture
- Flapper—failure to seal
