

INTRODUCING DPI'S SUBROGATION SCREENING PROGRAM!

Your adjusters are overwhelmed handling catastrophe claims. You have to take care of your customers. But subrogation dollars can help offset the costs of those catastrophe claims.

DPI wants to help. We have developed a Subrogation Screening Program to help you pursue subrogation in a cost-effective way, time-efficient way.

HOW DOES THE PROGRAM WORK?

STEP 1: Complete a Subrogation Screening Form and send the evidence to us, along with a \$200.00 Screening Fee, standard shipping rates to apply.

STEP 2: DPI will review the file and evidence and contact you to let you know if we recommend pursuing subrogation and what level of inspection we think best.

STEP 3: If you choose to proceed, a credit for the \$200.00 Screening Fee will be applied to the recommended inspection fee. If you choose not to proceed, we will return or dispose of the evidence and the file will be closed.

WHY WILL THE PROGRAM WORK?

DPI has been an industry leader in product failure analysis for over 30 years, servicing all 50 states. Our research database and inventory of exemplars is second-to-none. Our team of experts can quickly do what your adjusters simply do not have time to – identify if there is a possibility of subrogation.

WHAT DO YOU HAVE TO LOSE?

For \$200.00 plus shipping, you can know whether to pursue subrogation. DPI cannot guaranty that your subrogation efforts will always be successful. But we can guaranty that they will never be successful if they are not being handled. We are here to help.

WHAT DO YOU HAVE TO GAIN?

Here are just a few examples of subrogation success stories:

EVIDENCE	CLAIM AMOUNT	RECOVERED	INSPECTION CHARGES
DVD Player	\$173,000	\$130,000	\$2,800
Backflow Preventer	\$60,000	\$30,000	\$637
Microwave Oven	\$20,556	\$18,000	\$644
Water Inlet Valve	\$10,000	\$10,000	\$367
