INSTRUCTIONS FOR SENDING A/C COMPRESSORS TO DPI

Thank you for choosing to send your evidence to DPI for inspection.

Please follow the instructions below on how to prepare and ship your evidence to DPI.

- All Freon & oil must be drained by a licensed A/C contractor. Federal law states that this is the responsibility of the A/C contractor.
- The compressor should be double bagged in plastic bags.
 - Care should be taken to not rip the bags.
 - Bags should be sealed at the top with tape.
- Apply directional arrow stickers or mark the box to indicate the upright position, and attach the pre-addressed label.
- Send to DPI for inspection. Additional shipping charges may apply due to the size and weight of the package.
